MAIA

RADIOFREQUENCY

Monopolar radiofrequency consists of a homogeneous heating of the deeper tissues, activating the production of collagen, and consequently a process of self-repair of the dermis with cellular renewal.

Great for treating the imperfections of photo-aging and cellulite, giving the skin tone and eliminating the much hated effect of the skin "orange peel".

- **STIMULATES CIRCULATION**
- **REDUCE DEPOSITS OF FAT**
- **LIFTING EFFECT ON FACE**
- **TONES**
- **DRAIN EFFECT**
